

Matthias Pinnewaert

Experience

Web Developer/Folding robot programmer 2017 -

Lesage nv

- Created a platform for the employees where they can look up and change orders and parts in a faster and more user friendly environment than the ERP software had to offer. (uses Vue.js and Express)
- Programmed and operated a industrial robot that folds metal plates.

Repair Engineer 2016 - 2017

ABC industrial parts

- Repaired industrial computers, plc's and motor drivers on a components level.

Education

Bachelor of Applied Science - Electronics 2011 - 2015

Odisee

- Internship: Telenet NV instructed to monitor the parameters of the cable network when they were upgrading the network. My mission was to develop an indicator device to check if the amplifiers were correctly adjusted to the new elements in the network.
